Summary

Certificate in Full Stack Web Development from UT coding bootcamp with a strong background in surgical services and anesthesia. Hands-on experience building user-focused applications using HTML, CSS, JavaScript, MySQL, MongoDB, Express, React, Node.js and more. Abilities to quickly learn new skills, respond quickly and effectively to emergencies, and staying calm under pressure will aid me in the fast-paced world of web development.

Technical Skills

HTML, CSS, SASS, JavaScript, JQuery, Bootstrap, Handlebars, Node, Express, React, MongoDB, MySql, Sequelize, PWA's, webpack, Git, OOP, TDD, and Linux commands.

Projects

Music & Movies
https://github.com/CraigMJensen/MusicAndMovies
https://jideogun.github.io/MusicAndMovies/
Summary: Searchable databases for Music using Spotify's API, and Movies using TMDB(The Movie Database) API.
Role: Backend and frontend for the Movie page
Tools: HTML, Bulma, CSS, JavaScript, JQuery

TekSess
https://github.com/CraigMJensen/Assess
http://teksess.herokuapp.com/
Summary: Create an account, write reviews, rate companies, and see what other people are saying about working for possible employers.
Role: Frontend handlebars and SASS and some backend for routes
Tools: Handlebars, SASS, Express, JavaScript, Sequelize, Bcrypt, Heroku

Employee Tracker
https://github.com/CraigMJensen/employee-tracker
Summary: Node.js application for keeping an employee roster. Managers can add, update, and remove employees, roles, and salaries.
Role: Sole Developer
Tools: Node.js, Express, MySql, Inquirer

Experience

Baylor, Scott & White Medical Center
Austin, TX
July 2016-Present
Certified Anesthesia Technician
- Initial setup of Operating rooms, hired on to a new facility that had to be created from scratch
- Set up all anesthesia equipment, stock, and work-flows to meet a start date successfully
- Led a team of 3 to reduce supplies on hand, saving thousands of dollars in stock that could have otherwise expired
- Create work-flows for cleaning and organization of operating rooms, able to start surgeries faster generating income for the facility and boosting patient satisfaction
- Work with the Anesthesiologists while patients are going to sleep and waking up, keeping patients safe during critical times
- Great at starting IVs, helping patients feel calm, and well taken care of before surgery boosting patient satisfaction scores. In turn improving the hospital's image

Certificates: BLS(Basic Life Saving), ACLS(Advanced Cardiac Life Saving), Cer A.T.(Certified Anesthesia Technician)

Lakeway Medical Center
Lakeway, TX
April 2012-July 2016
Certified Anesthesia Technician
- Opened Operating rooms, got 6 operating rooms set up and ready to open by the scheduled start date successfully
- Worked with an interdepartmental team on fire safety, patient safety, operating room maintenance and cleaning, and staff engagement
- Attended Anesthesiologists with intubation, extubation and various procedures, keeping patients and staff safe, improving patient satisfaction scores
- Learned how to start IVs becoming the go-to IV starter, getting surgeries started on time
- Trained multiple people in operating room etiquette, technique, and safety, creating a safe and enjoyable workplace
- Saved lives during emergencies with CPR and other life-saving techniques
- Rotated stock to keep waste to a minimum, saving the organization money

Certificates: BLS(Basic Life Saving), Cer.A.T.(Certified Anesthesia Technician)

Education

Certificate: University of Texas, Austin, Coding Boot Camp, Austin, TX April 2022
